### **EMC EMC Certification**

**e20-360: networked storage-nas implementation**

**Practice Exam:** e20-360 Exams

**Exam Number/Code:** e20-360

**Exam Name:** networked storage-nas implementation

**Questions and Answers:** 110 Q&As

( [EMC Certification](#) )

"networked storage-nas implementation", also known as e20-360 exam, is a EMC certification. With the complete collection of exam questions, Just4Study has assembled to take you through 110 Q&As to your e20-360 exam preparation. In the e20-360 exam resources, you will cover every field and category in EMC Certification helping to ready you for your successful EMC Certification.

Exam : [e20-360](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for EMC EMC Certification e20-360 (networked storage-nas implementation) examination of original title complete coverage. e20-360 exam questions help you pass the exam.

#### **Just4Study e20-360 Feature:**

\* High quality - High quality and valued for the e20-360 Exam: 100% Guarantee to Pass Your e20-360 exam and get your EMC Certification certification.

\* Authoritative - Authoritative braindumps with complete details about e20-360 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed EMC Certification resources, you will minimize your **EMC EMC Certification** cost and be ready to pass your e20-360 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free EMC Certification demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the e20-360 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free e20-360 Demo Download**

Just4Study offers free demo for EMC Certification e20-360 exam (networked storage-nas implementation). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **EMC EMC Certification e20-360** examination of original title complete coverage.e20-360 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: e20-360**

Exam Name: networked storage-nas implementation( EMC Certification )

Questions and Answers: 110 Q&A

[EMC e20-360](#) Test belongs to one of the EMC Certification certified test, if needs to obtain the EMC Certification certificate, you also need to participate in other related test, the details you may visit the [EMC Certification](#) certified topic, in there, you will see all related EMC Certification certified subject of examination.

Just4Study professional provide EMC Certification e20-360 the newest Q&A, completely covers e20-360 test original topic. With our complete EMC Certification resources, you will minimize your EMC Certification cost and be ready to pass your e20-360 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC E20-360

Title : Networked Storage-NAS Implementation Exam

1. Which cable type is used to connect from a com port on the Service PC to the Com port on the front of an NS600 Control Station?

- A. RJ11
- B. Crossover
- C. Null Modem
- D. Straight-thru

Answer: C

2. What is a characteristic of Windows access control?

- A. Access denied overrides all other permissions assigned to a user
- B. When a folder and file have conflicting permissions, the folder permissions apply
- C. When a share permission and NTFS permission conflict, the least restrictive applies
- D. When a folder and file have conflicting permissions, data mover determines access rights

Answer: A

3. Since an NS600S has only one [1] Data Mover and does not have a Standby Data Mover, what happens when that Data Mover fails?

- A. The Data Mover is issued a reboot to try and restore service
- B. It is powered down and the Control Station issues a Call Home
- C. The Service Processor (P) takes over and normal operation continues
- D. Alerts are sent to the Celerra Web Browser and Call Home is not issued

Answer: A

4. What does the Disk Array Enclosure [DAE2], rack mounted enclosure, house?

- A. Four [4] Disk Drives, two [2] Power Supplies and two [2] Link Controller Cards
- B. Two [2] Link Controller Cards, two [2] Power Supplies and up to fifteen [15] Disk Drives
- C. Up to fifteen [15] ATA Disk Drives, two [2] Link Controller Cards and two [2] Power Supplies
- D. Four [4] Fibre Disk, eleven [11] ATA disk Drives, four [4] Link Controller Cards and two [2] Power Supplies

Answer: B

5. Which improvement is made when converting an NS600G direct connect to SAN connect?

- A. Performance
- B. Data throughput
- C. Back-end redundancy
- D. Front end network connectivity

Answer: C

6. What happens when Disks 0 through 4, in the first Disk Array Enclosure [DAE2] have been swapped between themselves in your NS600?

- A. There is no problem; this can be done at any time
- B. The disk will be marked as faulted and a single reboot will clear the fault
- C. The array will be marked as faulted and several reboots will clear the fault
- D. The disk will not be recognized, will be marked as faulted and the array will not be able to boot

Answer: D

7. What does the SPS (Standby Power Supply) to an NS600/NS600G allow the Celerra to do during a power failure?

- A. Maintains full system availability
- B. Power off the components immediately
- C. Destage write cache to the vault on the first DAE2
- D. Keep the components powered up until main power is restored.

Answer: C

8. How does the NS600/NS600S come preconfigured from the factory?

- A. NAS Server via Fibre Switch
- B. NAS Server in a heterogenous SAN
- C. NAS only, back-end dedicated storage
- D. NAS and SAN Open Back-end storage

Answer: C

9. What is a common name resolution used by both UNIX and Windows?

- A. NIS
- B. DNS
- C. WINS
- D. LMHOSTS

Answer: B

10. If Standby Power Supply (SPS) A or Standby Power Supply (SPS) B become disabled or fail, what is the consequence?

- A. The up and running SPS will draw more power
- B. All writes to the Data Mover file systems are halted
- C. The NS600/NS600G will power down without problems
- D. Write cache will be disabled and performance will be degraded

Answer: D

11. Which three [3] NS600 components are connected to the Internal Ethernet Switch?

- A. Data Mover
- B. Control Station
- C. Storage Processor
- D. Standby Power Supply

Answer: ABC

12. The NS600G/GS support either RAID 1 or RAID 5 Groups. Which NAS RAID Groups are they restricted to?

- A. RAID;1 pairs, 4+1;RAID Group, 7+1;RAID Group and 6+1 ATA Disk Drives RAID Group
- B. RAID;1 pairs, 4+1;RAID Group, 8+1;RAID Group and 6+1 ATA Disk Drives;RAID Group
- C. RAID;1 pairs, 5+1;RAID Group, 8+1;RAID Group and 7+1 ATA Disk Drives;RAID Group
- D. RAID;1 pairs, 4+1;RAID Group, 8+1;RAID Group and 3+1 ATA Disk Drives;RAID Group

Answer: B

13. CLARiiON uses 520 byte sectors while other vendors use only 512 byte sectors. What are the eight [8] extra

bytes used for?

- A. To create alternative sectors
- B. For additional data protection
- C. For Disk Drive Log errors only
- D. To store cache writes for a power failure

Answer: B

14. Which component on a DAE2 can be hot swapped?

- A. MUX board
- B. SP Enclosure
- C. Link Controller Cards
- D. Data Mover Mother Board

Answer: C

15. Which protocol is the Common Internet File System (CIFS) based on?

- A. NFS
- B. SMB
- C. NTFS
- D. Samba

Answer: B

16. Your customer has a Celerra which is part of a Windows NT domain. They are upgrading to Windows 2000 and you need to configure the data mover to join the new domain. After removing the NetBIOS name from the data mover, you try to add the comname. When you issue the command, you get an error that the computer name already exists. What do you do next?

- A. Choose another computer name to use
- B. Use another administrator account and retry
- C. Stop CIFS before trying to add the comname
- D. Remove the computer name from the NT domain

Answer: D

17. What are the requirements for connecting an NS600G/GS to be Direct Connected to an existing CX600?

- A. Two [2] free ports per SP, 5 unbound disk drives, Access Logix
- B. Two [2] free ports per SP, 5 unbound disk drives, PowerPath 3.01
- C. Four [4] free Fibre Switch ports, 5 unbound disk drives, PowerPath
- D. Two [2] free ports per SP, 8+1 Raid 5 Group with 6 LUNs, Access Logix

Answer: A

18. What platform do you need to run the Init Wizard on?

- A. UNIX
- B. Linux
- C. Solaris
- D. Windows

Answer: B

19. By default, Telnet is disabled on the Control Station. Which command enables it without a reboot?

- A. `$/sbin/chkconfig -s telnet`
- B. `#!/sbin/chkconfig telnet on`
- C. `$/sbin/chkconfig telnet on`
- D. `#!/sbin/chkconfig telnet -start`

Answer: B

20. Which RAID configurations can be used with the NS600?

- A. RAID Level 1 and RAID Level 5
- B. RAID Level 1, RAID Level 5 and RAID S.
- C. RAID Level 1/0, RAID Level 5 and RAID S.
- D. RAID Level 1, RAID Level 1/0 and RAID Level 5

Answer: A
