

## e20-665 braindumps

### EMC EMC Certification

**e20-665: networked storage-ns installation and troubleshooting**

**Practice Exam:** e20-665 Exams

**Exam Number/Code:** e20-665

**Exam Name:** networked storage-ns installation and troubleshooting

**Questions and Answers:** 111 Q&As

( [EMC Certification](#) )

"networked storage-ns installation and troubleshooting", also known as e20-665 exam, is a EMC certification. With the complete collection of exam questions, Just4Study has assembled to take you through 111 Q&As to your e20-665 exam preparation. In the e20-665 exam resources, you will cover every field and category in EMC Certification helping to ready you for your successful EMC Certification.

Exam : [e20-665](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for EMC EMC Certification e20-665 (networked storage-ns installation and troubleshooting) examination of original title complete coverage. e20-665 exam questions help you pass the exam.

#### **Just4Study e20-665 Feature:**

\* High quality - High quality and valued for the e20-665 Exam: 100% Guarantee to Pass Your e20-665 exam and get your EMC Certification certification.

\* Authoritative - Authoritative braindumps with complete details about e20-665 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed EMC Certification resources, you will minimize your **EMC EMC Certification** cost and be ready to pass your e20-665 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free EMC Certification demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the e20-665 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free e20-665 Demo Download**

Just4Study offers free demo for EMC Certification e20-665 exam (networked storage-ns installation and troubleshooting). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **EMC EMC Certification e20-665** examination of original title complete coverage.e20-665 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: e20-665**

Exam Name: networked storage-ns installation and troubleshooting( EMC Certification )

Questions and Answers: 111 Q&A

[EMC e20-665](#) Test belongs to one of the EMC Certification certified test, if needs to obtain the EMC Certification certificate, you also need to participate in other related test, the details you may visit the [EMC Certification](#) certified topic, in there, you will see all related EMC Certification certified subject of examination.

Just4Study professional provide EMC Certification e20-665 the newest Q&A, completely covers e20-665 test original topic. With our complete EMC Certification resources, you will minimize your EMC Certification cost and be ready to pass your e20-665 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC E20-665

Title : Networked Storage-NS Installation and Troubleshooting Exam

1. Which command is used from a UNIX host to display ALL hops to the destination host?

- A. ping
- B. tracert
- C. ifconfig
- D. traceroute

Answer: D

2. A customer is unable to Telnet into the Control Station of his NS600 from a Windows client. You have verified that the Telnet service is enable on the Control Station, and the customer has also proved network connectivity is working because "ssh" and ftp work fine. What would be the next step in finding out why Telnet is not working?

- A. Check for any firewalls blocking port 23
- B. Check for any firewalls blocking ports 20 & 21
- C. Ping the Control Station to make sure it is running
- D. Run traceroute to verify the path to the Control Station

Answer: A

3. When upgrading the NAS code on a Celerra NS after the Control Station is rebooted, which file system must be mounted in addition to /nas, /nas/dos, /nbsnas before proceeding?

- A. /nas/bin
- B. /nas/var
- C. /nas/site
- D. /nas/sbin

Answer: B

4. Which layers of the Open System Interconnection (OSI) does the "ping" utility test?

- A. Physical and Data Link
- B. Network and Transport
- C. Physical, Data Link, and Network
- D. Data Link, Network and Transport

Answer: C

5. Which tool is used to test network connectivity?

- A. ping
- B. snoop
- C. netstat
- D. ifconfig

Answer: A

6. You are replacing a Control Station in a Celerra NS series, you have just finished verifying the EMCNAS code version to be installed, and documented the Control Station configuration. What is the next step?

- A. Boot the Control Station
- B. Install the EMCNAS code
- C. Save the server log to a file
- D. Document the Control Station cable connections

Answer: D

7. Which component of SNMP queries SNMP agents to view information, change settings, etc.?

- A. MIB
- B. Agent
- C. Server
- D. Manager

Answer: D

8. Which command shows all established connections to a Data Mover?

- A. server\_netstat
- B. server\_nfsstat
- C. server\_sysstat
- D. server\_cifsstat

Answer: A

9. How many Celerra/CLARiiON LUNs are created in an 8 + 1 RAID 5 configuration?

- A. 2
- B. 4
- C. 6
- D. 8

Answer: A

10. Which file shows services and their ports configured on a UNIX host?

- A. /etc/ports
- B. /etc/service
- C. /etc/services
- D. /etc/nsswitch

Answer: C

11. Which command is used to identify a primary Data Mover?

- A. nas\_server
- B. server\_info
- C. nas\_standby
- D. server\_standby

Answer: A

12. A host has the following IP address and default gateway. Select the subnet mask that will allow the host to access remote networks.

IP address: 10.6.230.196

default gateway: 10.6.128.1

- A. 255.255.128.0
- B. 255.255.192.0
- C. 255.255.224.0
- D. 255.255.255.0

Answer: A

13. You are performing a NAS code upgrade on a Celerra NS Gateway. At what point in the procedure should you run the `upgrd_ckvX.bin -r 1` command?

- A. After rebooting the system
- B. After mounting the CD-ROM
- C. Before mounting the CD-ROM
- D. Before putting the passwd and group files on the Data Movers

Answer: C

14. Which script is used before a Celerra NAS code upgrade to perform health checks and backups and identify parameter changes?

- A. `pre_upgrd.bin`
- B. `upgrd_ckvX.bin`
- C. `Linux_savit.bin`
- D. `universal_upgrd.bin`

Answer: B

15. Which command is used on a Sun host to obtain the Ethernet address of a network adapter?

- A. NDD
- B. `eth0`
- C. `ifconfig`
- D. `ipconfig`

Answer: C

16. What is required to join a Celerra CIFS server to a Windows Active Directory domain?

- A. DNS, NTP
- B. DNS, WINS
- C. IP interface, Share name
- D. Administrator's password, NIS

Answer: A

17. What is the minimum disk configuration for a Celerra/CLARiiON implementation?

- A. 2 disks and 1 hot spare
- B. 4 disks and 1 hot spare
- C. 5 disks and 1 hot spare
- D. 8 disks and 1 hot spare

Answer: C

18. In which storage profile does a "4 + 1 RAID 5" disk configuration belong?

- A. `clar_r1`
- B. `clarata_archive`
- C. `clar_r5_economy`
- D. `clar_r5_performance`

Answer: D

19. When performing a Celerra Health Check on a NS Series, the script `upgrd_ckvX.bin` is run to create NAS backup files. Which directory does it create to store those files?

- A. `nas/usr/nsdb_cs`
- B. `nas/etc/nasdb_cs0`
- C. `nas/dev/recover_cs`
- D. `/nas/var/recover_cs0`

Answer: D

20. You are able to connect to a web server with Internet Explorer and view its contents. However, when you try to ping the server you receive a "Request Timed Out" message. What is the cause?

- A. Incorrect subnet mask
- B. Incorrect default gateway
- C. Firewall blocking ICMP packets
- D. No route to the server's network

Answer: C
