e20-870: Storage Management for Implementation Engineers

Practice Exam: e20-870 Exams

Exam Number/Code: e20-870

Exam Name: Storage Management for Implementation Engineers

Questions and Answers: 120 Q&As

([EMC Certification](#))

"Storage Management for Implementation Engineers", also known as e20-870 exam, is a EMC certification. With the complete collection of exam questions, Just4Study has assembled to take you through 120 Q&As to your e20-870 exam preparation. In the e20-870 exam resources, you will cover every field and category in EMC Certification helping to ready you for your successful EMC Certification.

Exam : [e20-870](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for EMC EMC Certification e20-870 (Storage Management for Implementation Engineers) examination of original title complete coverage. e20-870 exam questions help you pass the exam.

Just4Study e20-870 Feature:

* High quality - High quality and valued for the e20-870 Exam: 100% Guarantee to Pass Your e20-870 exam and get your EMC Certification certification.

* Authoritative - Authoritative braindumps with complete details about e20-870 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed EMC Certification resources, you will minimize your **EMC EMC Certification** cost and be ready to pass your e20-870 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free EMC Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the e20-870 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free e20-870 Demo Download

Just4Study offers free demo for EMC Certification e20-870 exam (Storage Management for Implementation Engineers). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **EMC EMC Certification e20-870** examination of original title complete coverage.e20-870 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: e20-870

Exam Name: Storage Management for Implementation Engineers(EMC Certification)

Questions and Answers: 120 Q&A

[EMC e20-870](#) Test belongs to one of the EMC Certification certified test, if needs to obtain the EMC Certification certificate, you also need to participate in other related test, the details you may visit the [EMC Certification](#) certified topic, in there, you will see all related EMC Certification certified subject of examination.

Just4Study professional provide EMC Certification e20-870 the newest Q&A, completely covers e20-870 test original topic. With our complete EMC Certification resources, you will minimize your EMC Certification cost and be ready to pass your e20-870 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC E20-870

Title : Storage Management Expert Exam for Implementation Engineers

1. The Finance group wants reporting on storage utilization of its applications in StorageScope. Which two [2] steps must be performed?

- A. Identify Managed Objects used by the application
- B. Create user-defined groups in ControlCenter Server
- C. Create user-defined groups in StorageScope Server
- D. Create user-defined storage pools in ControlCenter Console
- E. Move the Managed Objects used by the application into a ControlCenter Console group

Answer: AE

2. A customer has installed SQL Server entirely on devices allocated from a Symmetrix array. Which ControlCenter agent includes alerts that will trigger when the response time of database disk I/Os becomes too high?

- A. Host Agent for Windows
- B. Common Mapping Agent
- C. Storage Agent for Symmetrix
- D. Database Agent for SQL Server

Answer: A

3. Your customer has a large two-Store distributed infrastructure which has been designed to manage their environment of 550 small hosts and 10 medium hosts. In the EMC published guidelines the customer's infrastructure is detailed as being able to discover 125 medium hosts or 13 large hosts in a single, one-hour off-peak timeslot. What is the minimum number of one-hour off-peak time slots that must be configured to discover this environment on a daily basis?

- A. One
- B. Three
- C. Four
- D. Five

Answer: A

4. In ControlCenter when the Oracle Agent is communicating through a firewall in a Windows environment. Which port needs to be open?

- A. 10869
- B. 10979
- C. 10989
- D. 10999

Answer: D

5. A customer wants to export reports from the StorageScope Web interface. Which two [2] formats can be used?

- A. XML
- B. JPG
- C. PDF
- D. CSV
- E. HTML

Answer: AD

6. What must be uninstalled to upgrade to ControlCenter 5.2 from an earlier version?

- A. StorageScope API
- B. Performance View
- C. StorageScope Server
- D. Integration Gateway Agent

Answer: B

7. Which method do you use to install the ControlCenter Command History Export Utility?

- A. Install from the ControlCenter CD1
- B. Download and install from Powerlink
- C. Push the utility from the ControlCenter Console
- D. Install from the ControlCenter Installation wizard

Answer: B

8. After ensuring that all of the DCPs are running, the administrator needs to verify each of the reporting applications to ensure that they are correctly installed, configured, and able to create reports from the collected data. Select two [2] of the steps in StorageScope needed to verify the setup and to verify that they have run.

- A. Job Details selection
- B. Run reports now button
- C. Report History selection
- D. Report Exports selection
- E. Update reports now button

Answer: BC

9. Which two [2] are true about the StorageScope API?

- A. Must be installed on the Repository host
- B. Generates XML files for custom reporting
- C. Must be installed on the StorageScope Server
- D. Provides an ODBC connection to the Repository
- E. Provides access to database views for custom reporting

Answer: AE

10. A new user "smith" is created on the ControlCenter server. This user is then added as a default ControlCenter Console user by the ControlCenter administrator. User "smith" should be allowed to perform only configuration and TimeFinder operations on all discovered Symmetrix units in ControlCenter. How can this be set up?

- A. Assign ECC Administrators and Symmetrix Configuration Manager rules to "smith"
- B. Add "smith" to ECC Administrators and Symmetrix Data Protection Manager user groups
- C. Assign Symmetrix Configuration Manager and Symmetrix Data Protection Manager rules to "smith"
- D. Add "smith" to Symmetrix Configuration Manager and Symmetrix Data Protection Manager user groups

Answer: D

11. A customer wants to give only user access view to StorageScope reports. Which rule applies?

- A. User must be added to the Administrators Group
- B. User must be added to the StorageScope View Rule
- C. User must be added to the StorageScope Administrator Group

D. All users, by default, have access to view StorageScope reports

Answer: D

12. A SAN administrator is concerned that ControlCenter alerts regarding unexpected zoning changes are not being reported quickly enough. What needs to be edited to reduce the time taken to alert on this event?

- A. Active Zone Sets Out of Sync Alert
- B. Discovery Scan Data Collection Policy
- C. Fabric Validation Data Collection Policy
- D. Communication Device Status Change Alert

Answer: C

13. A customer wants his default SQL Server instance discovered in ControlCenter 5.2. Which action must be taken for a successful discovery?

- A. Enter the SQL Server Hostname in the DB Instance field of the assisted discovery interface
- B. Enter the name of the specific SQL Server database (e.g., Northwind) in the DB Instance field of the assisted discovery interface
- C. Create a net service connection for the SQL Server instance on the Mapping Agent Host. Then enter the net service name in the DB Instance field of the assisted discovery interface
- D. Create an ODBC Data Source Name (DSN) for the SQL Server instance on the ControlCenter Server Host. Then enter the DSN in the DB Instance field of the assisted discovery interface

Answer: A

14. A new Cisco MDS 9000 series switch has to be discovered in ControlCenter. What are two [2] prerequisite steps that must be performed on the switch to ensure a successful discovery?

- A. All HBAs and Storage Ports are cabled
- B. Create an SNMP community with rw privileges
- C. Create SNMPv3 users with administrative privileges
- D. Set up the FCC Agent Host as an SNMPv3 trap recipient
- E. Check that the SAN-OS version is supported by ControlCenter

Answer: BE

15. Click the Exhibit button.

The Storage Provisioning Service Policy for a Sun host was created with the isable host actions box unchecked.

Which file is modified when the policy is executed?

- A. The /etc/hosts file is modified
- B. The /etc/system file is modified
- C. The /kernel/drv/sd.conf file is modified
- D. The /kernel/drv/lpfc.conf file is modified

Answer: C

16. ControlCenter 5.2 SP1 SAN Manager currently supports importing of aliases for which switches?

- A. Cisco MDS9216
- B. Brocade DS-32B
- C. Brocade DS-16B
- D. McData DS-140M

Answer: D

17. In order for repetitive allocation task to be successful, which prerequisite needs to be in place before provisioning?

- A. Zoning pools
- B. Storage pools
- C. Allocation pools
- D. Device group pools

Answer: B

18. After a lightning strike, a Connectrix M series switch was replaced with an identical spare. The new switch was configured using Telnet. Now, Storage Provisioning Services (SPS) reports errors during attempts to allocate certain volumes. Why?

- A. SNMP community is wrong
- B. Telnet is no longer supported
- C. An active zoneset is obsolete
- D. Switch password was changed

Answer: C

19. A ControlCenter user cannot push an Oracle Agent to Host XYZ because the Oracle Agent is NOT available in the install wizard list. Which three [3] would cause this?

- A. OS type not supported
- B. Not licensed in the console
- C. Master agent on Host XYZ is not running
- D. Existing entry in the ctg.ini file on Host XYZ
- E. Remote_install directory has an existing Oracle Agent folder entry for Host XYZ

Answer: ADE

20. How would an administrator define Windows user groups that correspond to functional VisualSAN roles?

- A. Use the "Administration" tab
- B. Edit the NetworkSecurity.properties file
- C. Use the "Settings>Role-Based Setting" menu
- D. Assign roles using the Windows Management Interface

Answer: B
