jn0-561: Juniper Networks Certified Internet Assoc(JNCIA-SSL) Exam

Practice Exam: jn0-561 Exams

Exam Number/Code: jn0-561

Exam Name: Juniper Networks Certified Internet Assoc(JNCIA-SSL) Exam

Questions and Answers: 120 Q&As

([JNCIA](#))

Exam : [jn0-561](#)

"Juniper Networks Certified Internet Assoc(JNCIA-SSL) Exam", also known as jn0-561 exam, is a Juniper Networks certification. With the complete collection of exam questions, Just4Study has assembled to take you through 120 Q&As to your jn0-561 exam preparation. In the jn0-561 exam resources, you will cover every field and category in Juniper Networks Certification helping to ready you for your successful Juniper Networks Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Juniper Networks JNCIA jn0-561 (Juniper Networks Certified Internet Assoc(JNCIA-SSL) Exam) examination of original title complete coverage. jn0-561 exam questions help you pass the exam.

Just4Study jn0-561 Feature:

* High quality - High quality and valued for the jn0-561 Exam: 100% Guarantee to Pass Your jn0-561 exam and get your JNCIA certification.

* Authoritative - Authoritative braindumps with complete details about jn0-561 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed JNCIA resources, you will minimize your **Juniper Networks JNCIA** cost and be ready to pass your jn0-561 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free JNCIA demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the jn0-561 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free jn0-561 Demo Download

Just4Study offers free demo for JNCIA jn0-561 exam (Juniper Networks Certified Internet Assoc(JNCIA-SSL) Exam). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Juniper Networks JNCIA jn0-561** examination of original title complete coverage. jn0-561 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: jn0-561

Exam Name: Juniper Networks Certified Internet Assoc(JNCIA-SSL) Exam(JNCIA)

Questions and Answers: 120 Q&A

[Juniper Networks jn0-561](#) Test belongs to one of the JNCIA certified test, if needs to obtain the JNCIA certificate, you also need to participate in other related test, the details you may visit the [JNCIA](#) certified topic, in there, you will see all related JNCIA certified subject of examination.

Just4Study professional provide JNCIA jn0-561 the newest Q&A, completely covers jn0-561 test original topic. With our complete JNCIA resources, you will minimize your JNCIA cost and be ready to pass your jn0-561 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Juniper JN0-561

Title : Juniper Networks Certified Internet Assoc(JNCIA-SSL) Exam

1. What is a disadvantage of using Client Server Application Layer Access?

- A.has limited auditing
- B.has only TCP/IP level authorization
- C.has operating system and/or JVM compatibility issues
- D.has limited resource access to enterprise Web applications and resources

Answer: C

2. Which three statements about IPSec VPNs are true? (Choose three.)

- A.IPSec VPNs are simple to deploy.
- B.IPSec VPNs are standards-based.
- C.IPSec VPNs provide a dedicated, always-on connection.
- D.IPSec encryption, data integrity, and authentication methods are well known.

Answer: BCD

3. Which model does not support clustering?

- A.SA700
- B.SA2000
- C.SA4000
- D.SA6000

Answer: A

4. Which statement is true about the IVE deployment option Two arm, DMZ?

- A.The external interface is plugged into the DMZ and the internal interface is plugged into the internal LAN.
- B.The internal interface is plugged into the internal LAN, behind a firewall with only SSL allowed to the IVE.
- C.The external interface is plugged into an external DMZ and the internal interface is plugged into an internal DMZ.
- D.The external interface is plugged into the external network without a firewall and the internal interface is plugged into the internal LAN.

Answer: A

5. Which three statements about a Server Certificate are true? (Choose three.)

- A.It is required for HTTP to function.
- B.It allows visitors to the server to authenticate its identity.
- C.It is a digital document that vouches for the identity of the server.
- D.It contains information about the server itself and the organization that owns the server.
- E.It is an electronic "drivers license" that establishes client credentials when doing business or other transactions on the Web.

Answer: BCD

6. When using W-SAM, which statement is true about client privileges? (Choose two.)

- A.The user needs Administrator privileges to download the ActiveX control.
- B.The user needs Administrator privileges to download W-SAM via the Java delivery mechanism.
- C.The user needs Administrator privileges in order for the IVE to interface with the client LSP and manipulate traffic.
- D.The user needs Administrator privileges in order for the IVE to automatically install Secure Application Manager on the client.

Answer: AD

7. Which three statements about SSL VPNs are true? (Choose three.)

- A.SSL VPNs are simple to deploy.
- B.SSL VPNs provide a dedicated, always-on connection.
- C.SSL VPNs provide high performance for individual connections.
- D.SSL VPNs use well-known technologies for secure individual connections.

Answer: ACD

8. What is a disadvantage of using Core Access?

- A.has limited auditing
- B.has no kiosk access
- C.has limited resource access
- D.requires administrator privileges on user machines to function

Answer: C

9. Which filter properly searches an AD/NT server directory via LDAP for the user login name and compares it to the user's IVE login name?

- A.cn=<USERNAME>
- B.cn=<samaccountname>
- C.samaccountname=<NAME>
- D.samaccountname=<USERNAME>

Answer: D

10. What are two functions performed by the Content Intermediation Engine? (Choose two.)

- A.Parser: This function processes data streams into chunks that can be manipulated by the transformers.
- B.Authorization: This function verifies the identity of users trying to access the IVE then forwards requests to the inside server using those credentials.
- C.Authentication: This function verifies the identity of users trying to access the IVE and then intermediates requests to the inside server using those credentials.
- D.Transformer: This function modifies the "chunked" data stream before it passes the data to the request handlers. Transformers modify internal URLs, HTML markup and scripts to refer to "virtual" URLs/markup/scripts sourced from the IVE appliance.

Answer: AD

11. Which two types of Digital Certificates are used by the IVE? (Choose two.)

- A.Client Certificates
- B.LDAP Certificates
- C.Server Certificates
- D.RADIUS Certificates

Answer: AC

12. Where is the IVE typically deployed in the network?

- A.behind the Internet firewall
- B.internally with all clients directly cabled to the IVE

- C.both interfaces on the outside of the Internet firewall in Transparent Mode
- D.parallel to the Internet firewall with one interface on the outside and one on the inside

Answer: A

13. Which two statements about TLS are true? (Choose two.)

- A.TLS is a descendent of SSL 3.0.
- B.It is not supported on the OpenSSL engine.
- C.It is the only transport protocol used by the IVE.
- D.It supports legacy SSL while codifying additional behaviors.

Answer: AD

14. Which Role-Based Session option would an administrator configure to allow a user to connect from different source IP addresses within the same user session?

- A.roaming session
- B.persistent session
- C.persistent password caching
- D.browser request follow-through

Answer: A

15. Which model has externally accessible, hot swappable hard drives?

- A.SA700
- B.SA2000
- C.SA4000
- D.SA6000

Answer: D

16. What are two benefits of using SSL? (Choose two.)

- A.The SSL client is included in all Web browsers.
- B.SSL usually requires no client side configuration.
- C.The SSL client is smaller than most IPSec clients, with half the options to configure than that of an IPSec client.
- D.SSL outperforms IPSec on every level because it operates at the network layer rather than the application layer.

Answer: AB

17. What is the function of SSL?

- A.encrypts data on the client's hard drive
- B.allows anonymous file transfer over the Internet
- C.protects clients from viruses and worms in email
- D.negotiates encryption keys and authenticates the server

Answer: D

18. You need to create a very detailed log search, but you do not have Central Manager installed.

How would you accomplish this?

- A.export the log and use third-party utility to search the file
- B.use dynamic logs and keep clicking on fields until you get as detailed as you need
- C.use the Filter tab and create your query using the query field, then reference the Filter Variables Dictionary
- D.use the edit query feature on the log screen and use the "?" to get access to the Filter Variables Dictionary

Answer: A

19. You have just created a resource policy for file access.

What is the default action?

- A.allow access
- B.deny access
- C.no default setting

D.refer to detailed rule

Answer: A

20. What are two benefits of using SSL? (Choose two.)

A.SSL is a session layer protocol so it has no NAT or firewall transversal issues.

B.Remote Access with SSL only requires a web browser on the client for basic access.

C.SSL is a network layer protocol so it provides easy access to large numbers of users with minimal configuration.

D.While SSL VPNs are more difficult to set up than IPSec VPNs, they are much faster and offer higher encryption rates than that of IPSec VPNs. r on the client.

Answer: AB
