

## um0-200 braindumps

### OMG OMG Certification

**um0-200: omg-certified uml professional intermediate exam**

**Practice Exam:** um0-200 Exams

**Exam Number/Code:** um0-200

**Exam Name:** omg-certified uml professional intermediate exam

**Questions and Answers:** 154 Q&As

( [OMG Certification](#) )

"omg-certified uml professional intermediate exam", also known as um0-200 exam, is a OMG certification. With the complete collection of exam questions, Just4Study has assembled to take you through 154 Q&As to your um0-200 exam preparation. In the um0-200 exam resources, you will cover every field and category in OMG Certification helping to ready you for your successful OMG Certification.

Exam : [um0-200](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for OMG OMG Certification um0-200 (omg-certified uml professional intermediate exam) examination of original title complete coverage. um0-200 exam questions help you pass the exam.

#### **Just4Study um0-200 Feature:**

\* High quality - High quality and valued for the um0-200 Exam: 100% Guarantee to Pass Your um0-200 exam and get your OMG Certification certification.

\* Authoritative - Authoritative braindumps with complete details about um0-200 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed OMG Certification resources, you will minimize your **OMG OMG Certification** cost and be ready to pass your um0-200 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free OMG Certification demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the um0-200 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free um0-200 Demo Download**

Just4Study offers free demo for OMG Certification um0-200 exam (omg-certified uml professional intermediate exam). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **OMG OMG Certification um0-200** examination of original title complete coverage. um0-200 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

**VUE/Prometric Code: um0-200**

Exam Name: omg-certified uml professional intermediate exam( OMG Certification )

Questions and Answers: 154 Q&A

[OMG um0-200](#) Test belongs to one of the OMG Certification certified test, if needs to obtain the OMG Certification certificate, you also need to participate in other related test, the details you may visit the [OMG Certification](#) certified topic, in there, you will see all related OMG Certification certified subject of examination.

Just4Study professional provide OMG Certification um0-200 the newest Q&A, completely covers um0-200 test original topic. With our complete OMG Certification resources, you will minimize your OMG Certification cost and be ready to pass your um0-200 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : OMG UM0-200

Title : omg-certified uml professional intermediate exam

1. What is NOT a purpose of a port owned by a classifier?

- A. serves as an end point for connectors
- B. specifies an association to the classifier
- C. hides the internals of that classifier from other classifiers
- D. provides a distinct point of interaction between the classifier and its environment

Answer: B

2. What most accurately describes the semantics modeled by the exhibit?

- A. HeaderGenerator and LineltemGenerator realize Invoicer.
- B. Invoicer realizes HeaderGenerator and LineltemGenerator.
- C. HeaderGenerator and LineltemGenerator are Invoicer ports.
- D. An Invoicer component is composed of a HeaderGenerator component and a LineltemGenerator component.

Answer: A

3. What best describes the distinction between a delegation connector and an assembly connector?

- A. A delegation connector can be used to model the internals of a component, while an assembly connector cannot.
- B. Assembly connectors provide white box views of components, while delegation connectors provide black box views.
- C. An assembly connector connects two components while a delegation connector connects the internal contract of a component with its external parts.
- D. An assembly connector connects the required interface or required port of one component with the provided interface or provided port of another component, while a delegation connector connects the external contract of a component with its internal parts.

Answer: D

4. To what does an internal structure of a class refer?

- A. the inheritance structure of that class
- B. the set of nested classifiers of that class
- C. the set of structural features of that class
- D. class and associations owned by that class
- E. the decomposition of that class in terms of interconnected parts

Answer: E

5. What does the composite structure exhibit show?

- A. The diagram is not valid.
- B. The two F interfaces must come from different packages.

- C. Requests for behavioral features of interface F through ports p1 and p2 can be distinguished.
- D. Requests for behavioral features of interface F through ports p1 and p2 will always result in the same behavior.

Answer: C

6. What best describes the semantics modeled by the exhibit?

- A. This is an illegal diagram.
- B. The OrderEntity component is part of the internals of the Invoicer component.
- C. The Invoicer has a complex connector that connects the GenerateInvoice interface with the Order interface.
- D. The Invoicer has a complex port that provides the interface GenerateInvoice and requires the interface Order.

Answer: D

7. Which is true of a provided interface associated with a port?

- A. represents an interface that must be defined within the classifier that owns the port
- B. identifies the services that the object owning the port expects of objects connected via that port
- C. identifies the services that the object owning the port can offer to other objects connected via that port
- D. represents an interface that must be defined in the same package in which the classifier owning the port is defined

Answer: C

8. What is an invocation action on a port used for?

- A. sending a message to that port
- B. receiving a message on that port
- C. creating a link and attach it to that port
- D. relaying the invocation via links connected to that port
- E. invoking the behavior of the classifier that owns the port

Answer: D

9. What is NOT true about a roles and role bindings?

- A. A role binding is an association.
- B. The same object may play roles in multiple collaborations.
- C. A role binding maps a connectable element to a role in a collaboration occurrence.
- D. The same connectable element may be bound to multiple roles in a single collaboration occurrence.
- E. A role typed by an interface specifies a set of features required by a participant in a collaboration.

Answer: A

10. Refer to the exhibit. What is the significance of the fact that the Administration interface symbol extends downward rather than leftward?

- A. There is no significance.
- B. The interface cannot be provided via a port.
- C. The interface does not require a delegation connector.
- D. The interface is not publicly visible on the component.
- E. The interface is the primary interface for the component.
- F. The interface is the primary provided interface for the component.

Answer: A

11. What statements are true about a composite structure? (Choose two)

- A. Collaborations are structured classifiers.
- B. A structured classifier is also an encapsulated classifier.
- C. Structured classifiers cannot contain instances of structured classifiers.
- D. Destroying an instance of a structured classifier normally destroys instances of its parts.
- E. The behavior of a structured classifier must be completely defined through the collaboration of owned or referenced instances.

Answer: AD

12. What interface restrictions does a port have?

- A. multiple required interfaces or multiple provided interfaces
- B. multiple provided interfaces and multiple required interfaces
- C. equal numbers of provided interfaces and required interfaces
- D. exactly one provided interface or exactly one required interface
- E. exactly one required interface and exactly one provided interface

Answer: B

13. Assume component A provides an interface P and requires an interface R. In order for a component B to be substituted for component A, what must be true?

- A. Components must be related to each other via a dependency.
- B. The interface that A requires must be type conformant with respect to the interface that B provides.
- C. The interface that B requires must be type conformant with respect to the interface that A provides.
- D. The interface that B requires must be type conformant with respect to the interface that A requires, and the interface that B provides must be type conformant with respect to the interface that A provides.

Answer: D

14. A component may legally participate in which relationship(s)?

- A. dependencies
- B. associations and generalizations
- C. dependencies and generalizations
- D. dependencies, associations, and generalizations

Answer: D

15. Which must be true in order to use a delegation connector to connect two components?

- A. The components must have complex ports.
- B. One component must be a subtype of the other.
- C. The components must be related to each other via a dependency.
- D. One component must be part of the internal realization of the other component.

Answer: D

16. Refer to the exhibit. How many interfaces does the CustomerService component make visible to its clients?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: D

17. What does the composite structure notation in the exhibit mean?

- A. Class C has internal structure.
- B. Object c1 is a kind of component.
- C. Port p is connected to an object called F.
- D. Port p realizes the features defined by interface F.
- E. Port p requires the features defined by interface F.

Answer: E

18. How can the internals of a component be presented?

- A. using a complex component connector
- B. component provides port or a component requires port
- C. in a compartment of the component box or a component requires port
- D. in a compartment of the component box or via boxes nested within the component box

Answer: D

19. Which list contains only connectable elements?

- A. port and connector end
- B. behavior, port and property
- C. connector end, port and part
- D. property, port, and parameter
- E. behavior, connector end, and port

Answer: D

20. An encapsulated classifier is characterized by which fact?

- A. has an encapsulation shell
- B. can own one or more ports
- C. hides information from other classifiers
- D. acts as a package and can own one or more classifiers

Answer: B
